# Mobile Wireframe

# Design Choice

The overall design is meant to feel like using a search engine.

Function like a search engine:

- Typing into a search bar
- Clicking the search button
- Hyperlink changing colour when visited (or hovered)

A familiar software look ie. File / Edit / View buttons.

# Colour Scheme

Helps to keep the website cohesive.

Used consistently through the website.

- Pastel colours reference:
- Calm
- Uplifting
- Vibrant and fun

# Ethical Issues

Security:

- The form on the View Page would need to keep the user's information secure to avoid a violation of privacy.

Accessibility and Responsive:

- Making the website available for all users.
- Including alt-text for images.
- Making the content adaptable so it can still be understood in different forms.

For reference to favourites: 

For references to challenges:

Kelsey Hardy. 

## Kelsey Hardy.

Hi! Name's Kelsey, I'm 29 and currently in the process of becoming a web dev! I'm studying the 10 month bootcamp at Coder Academy and looking forward to that checkered flag! At the moment, I'm working in the retail sector, but hopefully soon I'll be able to explore something different. On the other side of things, I have an awesome husband and two incredible twin toddlers who keep me on my toes!
